

Overview

DAYOU NETWORKS DSW2724G-PF11 is high performance managed 24-port PoE(Power over Ethernet) Ethernet switch. This device makes centralized power supply come true and provides up to 30W watts to power device. DAYOU PoE device can be used to Power IEEE 802.3af and 802.3at compliant powered device(PD) by Ethernet cable and to deliver both data and power to the IP device, such as IP telephones, wireless Access Point and security Cameras without the additional burden of power equipment for the availability of the network to increasing.

DSW2724G-PF11 is 24port 10/100/1000base-T (RJ-45) PoE ports and four 100/1000Base-X (SFP) ports and Non-Blocking Switching Fabric Structure on all ports, supports Wire-Speed . Also supports multicasting, QoS capabilities, enhanced security features and so on.

DSW2724G-PF11

PoE(Power over Ethernet) Support

L2 Switch sub-stage of the configuration that can cope with the power to IEEE 802.3af, 802.3at PoE (Power over Ethernet) feature is supported by a new idea and can react more flexibly.

Network systems management

SNMP v1/v2, MIB II, RMON MIB, and applied to the remote network management can be more easily. CLI commands, such as organized through the USB port and OS (firmware) upgrade available on the system configuration.

Improved performance

Non-blocking Switching fabric for high performance stable and 56Gbps switching capacity and up to speed packet processing 41.6Mpps support.
